Something **NEW** has been added to **McARDLE'S**

It is with great pleasure and pride to announce that McArdle's has purchased the MacMillen Co. Florist, Arch Street, Greenwich. The MacMillen Co. is the oldest florist business in Greenwich. It was established in 1910 by Mr. and Mrs. MacMillen. In 1923 it was sold to Mr. Carlson and Mr. Frederick Lagerstram by Mrs. MacMillen who at that time was a widow. In 1944 the business was sold to Mr. Theodore Sinzinger who operated the MacMillen Co. for 19 years.

The MacMillen Co. consists of a display shop that is connected to a show house, plus six greenhouses. It occupies over an acre of land. We plan to operate the business in the same way that Mr. Sinzinger has been so successful with over these past years. We shall do our best to maintain the fine reputation that this firm has enjoyed over such a long period of time. The name will be retained and the business will be operated as a division of the McArdle Seed Co.

James B. McArdle, Jr. who recently graduated from Cornell University, specializing in Floriculture and Horticulture is associated with this new venture. This new addition to our business makes us a more complete horticultural organization than ever. There is no doubt that each operation will be of much help to each other and that both businesses will benefit from each other.

We would also like you to know that a charge customer of McArdle's automatically becomes a charge customer of MacMillen's and vice versa.

At this time I would like to offer my sincere thanks to the people of Greenwich and neighboring communities for their liberal support and patronage that made this new acquisition possible. To the employees, each and everyone I say, "Thank you too for making this new addition to our business possible."

"A Clean Lawn is a Healthy Lawn"

The New E-Z Power Rake

This is a new machine for removing thatch. Thatch is an accumulation of materials mostly grass clippings, that collect in your lawn area year in and year out as a result of repeated mowings. This surface thatch usually is an inch or two thick, sometimes more.

Lawn experts now state that this is what happens to a lawn area that has an accumulation of surface thatch. The thatch acts like an ink blotter. It prevents water from penetrating into the soil to the roots of the grass. It smothers grass. This new machine will remove this surface thatch from your lawn area. By removing this surface thatch you will allow moisture, air and plant food to get into your lawn. You will also have fewer problems with turf diseases. Thatch harbors disease spores and is an ideal breeding area for fungus. Raking, catching or sweeping your grass clippings after mowing is now being recommended more than ever.

The delivered price of this machine is \$167.85. It has a 2 H.P. Briggs & Stratton motor, and has an operating width of 18 inches. It weighs 74 lbs. and is very easy to handle. For the smaller home owner we rent these machines. Further details on request.

Scotts Kwik to Control Chinch Bugs

These chinch bugs under glass are magnified seven times. Chinch bugs attack grass by piercing their tiny beaks into the grass stems to suck out juices. The grass wilts and turns brown. They are active in full sun only. They are especially active in hot, dry weather from early June until frost. Use Kwik to kill these insects. Small bag (treats 1000 sq. ft.) \$2.95; large bag (treats 2500 sq. ft.) \$5.95; 10 large bags \$53.50.

McArdle's Town of Greenwich Grass Seed is especially adapted to this locality

The New Town of Greenwich Grass Seed Mixture

The new Town of Greenwich grass seed mixture was formulated by Mr. Joseph A. Dietrich, Supt. of Parks and Trees, of the Town of Greenwich. It differs from the old Town of Greenwich mixture that it contains Altra C-1 Kentucky Bluegrass rather than straight Kentucky Blue, and Pennlawn Fescue rather than Illahee Fescue. The other ingredients remain the same. It also has a darker green color than the old formula. Use 3-4 lbs. per 1,000 sq. ft. 1 lb. \$1.50; 5 lbs. \$7.25; 25 lbs. \$35.00; 50 lbs. \$69.00; 100 lbs. \$135.00.

Sunnilawn

Many new home owners and landscapers use this grass seed mixture. We also call it the Landscaper's Mixture. It is a quick grower, but not as long lasting as the higher priced grass seed mixtures. It grows well under rough soil conditions and contains white clover. Use 6 lbs. per 1000 sq. ft. Lb. 85 cts.; 5 lbs. \$3.90; 25 lbs. \$18.60; 50 lbs. \$36.00; 100 lbs. \$69.00.

Cool Weather, Plenty of Moisture
less weeds make
Fall Seeding Best

The Old Town of Greenwich Grass Seed Mixture

The Old Town of Greenwich Grass Seed formula has proven itself to be very satisfactory over the past years. Because of its high fescue content, it is adapted to shade and sun. Its velvety green color is outstandingly good, and its texture is very fine. It can also stand dry weather better than most mixtures. Those who have tried it are most satisfied with the

results. The repeat business indicates this to us. One Riverside, Conn., customer who moved to California writes and tells us how well it even does in California. Use 3-4 lbs. per 1000 sq. ft. Lb. \$1.00; 5 lbs. \$4.65; 25 lbs. \$22.50; 50 lbs. \$44.00; 100 lbs. \$87.00.

McArdle's High-Organic Fertilizer

10-6-4 with Urea Form for Lawns and Trees

Contains 10% nitrogen, 6% phosphoric acid, 4% potash. Especially made for Connecticut soil. On lawns, spread evenly at the rate of 10 lbs. per 1,000 sq. ft. anytime after August 25. Spread when the grass is dry and the temperature is not above 75 degrees, and also when the weather is not too humid. For quicker action water thoroughly after application. For best results apply with a good fertilizer spreader. Use setting No. 6 for a Scotts Spreader. For trees use 3 lbs. of McArdle's 10-6-4 for each inch of diameter on shade and evergreen trees. 50 lbs. \$4.50; 100 lbs. (2-50 lbs.) \$8.50; 500 lbs. (10-50 lbs.) \$41.25; 2,000 lbs. \$160.00.

Clout For Crabgrass Control

Clout is used in summertime to clear out crabgrass. Two applications, a week apart, will do the job. It may temporarily brown good grass. Clout also knocks out foxtail, dallis grass, and young goose grass. Repeat treatments clean out nutgrass. To apply, the proper scale setting on your Scotts Spreader is No. 7.

For a New Lawn without Digging

If you want a new lawn without digging, just make an overall application of Erase in late Summer or early Fall. One week later remove as much thatch as possible, aerate, fertilize with Turf Builder and reseed. If you only want to improve your existing lawn we recommend this:

Late Summer and Fall Program

1. Remove Thatch.
2. Aerate.
3. If crabgrass is a problem treat lawn with Clout. Two applications one week apart will control crabgrass.
4. Any plantain, buckhorn, dandelions or other broad-leaved weeds? If so now is the time to clear them with Scotts 4XD.
5. Grass chewing insects at work? Stop grubs with Cope. Stop chinch bugs with Kwit.
6. Grass is now trying to grow? Turfbuilder will give it a good boost.
7. Reseed where necessary.

Scott's Turf Builder

Turf Builder is especially formulated by Scotts to make lawns healthy, vigorous and sparkling green. Rich in plant nutrients that strengthen roots and stimulate blade growth. Turf Builder is the best buy for your fertilizer dollar. To apply, the proper scale setting on your Scotts Spreader is No. 6.

Erase

Erase kills just about every kind of weed and grass without sterilizing the soil. Just the thing for getting rid of unwanted vegetation in walks, drives or paths. Also good for spot-treating those "hard-to-kill" weeds in the lawn or in flower beds. For a new lawn without digging, just make an overall application of Erase in late summer or early fall. Then plant Scotts seed and fertilize with Turf Builder one week later. To apply, the proper scale setting on your Scotts Spreader is No. 11.

DAFFODILS--NARCISSI . . .

Plant Daffodils and Narcissi in Groups

Seven or nine bulbs, or even more, of the same variety planted in groups are more effective than bulbs planted in a straight row. The earlier Daffodils and Narcissi are planted, the better root system they develop, which results in bigger and better blooms. Bulb food applied at time of planting produces still better results. Plant bulbs 6 inches deep and about 6 inches apart.

If you do not find any particular variety you are in need of, on these pages, kindly let us know. If not in stock, we can procure and supply at regular prices. Order early to be sure of the best.

25 bulbs of one variety sold at the 100 rate. 10% quantity discount on 1,000 bulbs or more on one variety or assorted varieties.

The number following the names of the various daffodils and narcissi represent their divisions and classification in accordance with the standards set up by the Royal Horticultural Society. In exhibiting daffodils and narcissi at flower shows you will find this information useful.

Darwin Hybrid Tulips

Hybrid Tulips possess extra pep, vim, and vigor. This past Spring at Bruce Park the hybrid tulips stole the show. Their strong habit of growth, their extra large flowers, made them the outstanding tulips in the garden. These hybrids bloom a week or so earlier than the Darwins.

CORNELL. 26 in. A must for every Cornelian with its extra large vermillion red flowers borne on extra strong stems. Loud her praises tell.

DARDANELLES. 26 in. This variety is said to have the largest bloom of any known tulip. The color is a dazzling scarlet.

DIPLOMAT. 26 in. This variety made an outstanding showing at the Greenwich Post Office last spring. Poppy red blooms.

DOVER. 20 in. This variety blooms the same time as White Emperor and makes a beautiful combination with it. The large fragrant fiery red flowers speak for themselves.

GUDOSHNIK. 25 in. Mr. McArdle's favorite. Because of this 1200 Gudoshnik are being donated by McArdle's to be planted at the Greenwich Post Office Plaza this Fall. Large yellow blooms spotted red, with black anthers and purple base.

RED MATADOR. 21 in. Carmine red with a scarlet flush. Stassen's, one of our bulb growers in Holland, swears by this variety. Since this is new with us this year, time will tell.

SPRING SONG. 26 in. This has bright red blooms flushed salmon at the base.

Plant TULIPS This Fall for Beautiful

DARWIN · BREEDER · COTTAGE

May-flowering

Our bulbs are all top-sized, 12 cm. Space bulbs 6 inches apart and plant 6 inches deep. For colorful effects in the border, plant Tulips of the same color in masses of six or more.

The typical features of the Darwin Tulips are the tall, upright, strong stems and the large, cup-shaped flowers. They have a wider range of color than the Cottages and the Breeders, from white to almost black. Breeder Tulips grow exceptionally tall and are generally of subdued colors, such as bronze, apricot, orange, and violet. The flowers of the Cottage Tulips are, as a rule, larger than the Darwin or the Breeder. The petals are usually pointed, and many of the Cottage varieties are fragrant. The colors of the Cottages are delicate and soft, and the stems do not attain the height that the Breeders and the Darwins do.

AMARYLLIS

Crimson Beauty. \$3.25 each; 3 for \$8.95

The Amaryllis we offer here are especially prepared for early blooming. Usually at least four flowers are produced on each stem. Soon after planting these prepared Amaryllis, a flower bud will appear. It is exciting and interesting to watch the spike push its way upward, day by day, and burst into bloom only 6 to 8 weeks after planting.

They are easy to grow. Just put them in a 6-in. standard pot in a sandy soil mixture. Allow one-half of the bulb to protrude above the soil level.

These amaryllis are ready for delivery November 15th. They make a wonderful gift. Available in the following varieties:

White Giant. \$3.75 each; 3 for \$10.50.
